

ABSTRACT

Sustainability in contact with Human Resource Management is an emerging topic. Many educational institutions are taking initiatives and promoting green management policies and practices in different management circles for wall to wall growth. Achieving campus sustainability is not possible without the involvement of students as one of the major stakeholders of a university. This study aims to comprehend Mehran University of Engineering and Technology Jamshoro's sustainable campus strategies and students' level of knowledge, importance and awareness about sustainable practices related to green campus. A literature review, field investigation, and surveys were conducted to ascertain the MUET green campus strategies. This study will help to determine that adoption of sustainable HRM initiatives at MUET Jamshoro to create a culture of well-being and health stability of staff. The survey results were analyzed by SPSS. MUET has started to work on sustainable plans such as: Solar panels, IOT labs, green events celebrations and other environmental activities. Implementing such practices aspires MUET Jamshoro towards continuous improvement in environmental matters and towards economic stability.

Keywords: Environmental sustainability, Green HRM, Sustainable work system.
